Her name is "Raven." She is a tom boy. All her power is all black and she can take things and when she takes something it turns black and she can make things go wherever she wants. And she can make all ways force field. And she is so cute.

And you know her mom lived in a place and she is the queen and that means that Raven is the princess. And that is a little bit weird and you know why because Raven hates girl stuff and she is really the princess and princess is a girl stuff. Sometimes she is angry and she is just going to her room and being alone. And sometimes she has feelings that she doesn't know what she is. Because she is a princess and when she is with the others she is a superhero. So that is all about Raven.
